Subject: Re The inspector legislation & Development Review Services

Hi my name is Tina and my husband is part of a motorcycle club and I am very proud of it and the other members and their families are my family as well. My family and myself feel more safe with the motorcycle clubs than most members of the public and some of the police as well. The motorcycle clubs do not intimidate me or my family or members of the public. I think the laws will change nothing and are not necessary at all I love going on rides with my husband and the club its refreshing and I enjoy it. If you take that away from them you are also taking it away from the wives and partners of the club. Our children and grandchildren love the bike and love coming to the club when they have family things on cause they feel part of a big family and that is what the guys are family. So please think before you go and enforce these laws on who it really is affecting not the public but the police.

yours sincerely

Tina a proud wife of a motorcycle club member
