Subject: Submission in regards to proposed bikie laws.

Hi my names Josh,

Im proudly apart of the devils henchmen motorcycle club of tasmania. I have no convictions and no such criminal history like many of my brothers within our club. We are like minded motorcycle enthusiasts we are NOT criminals, drug dealers, extortionists, thieves, murders etc what we are is a group of close mates as close as family. We get together talk about our daily lives and our families. We are working class people, all workers who pay our taxes. Or retired from a life of working. For 48 years our club has been established in tasmania with little to no disturbance to the public, by introducing these proposed laws about our choice of clothing that we are extremely proud to wear is taking away our basic human rights. How is this fair? What next? The suburbs we are allowed to live in? The jobs we are allowed to have? I will be dictated to when i have done nothing wrong along with my brothers. We are being labelled as a 1% club when we are not a 1% club. We are a motorcycle club. How can you take away our basic human rights? Chase the criminals, and drug dealers that are responsible for any problems within this state not a group of people that put a particular item of clothing on when we ride our bikes.

Thank you.
