Subject: My submission for the preposed tasmanian bikie laws, its a copy of the same one i submitted to the VLAD laws in QLD a few years ago.

To who it my concern this is my submission for the vlad laws review. I am a former member of a motorcycle "club" as i am a third generation only child plus have never married or had children the "club" was the only family i had. Haveing to leave that "club" has caused me much depression & heartache plus a great deal of loneliness as i have no one to interact & socialize with outside my work mates. Haveing a clubhouse was our base to socialize with fellow members and family in a relaxed atmosphere where we didn't have to worry about people disrespecting us or discriminating against us for disagreeing with our "choice" of lifestyle. Not haveing a clubhouse is like a football team with no field to play or train on, plus if you put the clubhouse at risk in any way shape or form you where banished from the "club" for life. Forceing a human being to walk away from his only family because of the actions of another group of individuals that i don't associate with in any way shape or form surely is against all common sense human rights. If these vlad laws are not abolished or severely amended i'm not looking forward to growing old to live on my own with no family support system around me and fear for my sanity and well being.
