Crime Statistics Supplement

The Department of Police, Fire and Emergency Management Crime Statistics Supplement 2018-19 provides a detailed breakdown of the offences reported, or becoming known to police in the financial year ending 30 June 2018. Five year trend data are included for many of the measures.

Prior to 2012-13 the Crime Statistics Supplement was published as a part of the *Department of Police and Emergency Management Annual Report*. From 2012-13 the Supplement has been removed from the Annual Report and published as a separate document.

Offences Recorded and Cleared: Tasmania

Total Offences increased by 6% (1,539 offences) to 27,842 offences in 2018-19, following a 4% reduction in 2017-18. Total Offences in 2018-19 was above the previous three year average (26,235).

Explanatory Notes

The statistics referred to in this supplement have been derived from offences reported to or becoming known to police during the financial year ending 30 June 2019. All 2017-18 statistics have been revised as at 1 August 2019.

Offences are broadly classified into the following four major offence categories:

- Offences Against the Person
- Offences Against Property
- Fraud and Similar Offences
- Other (Miscellaneous) Offences

Offences Recorded

Offences 'recorded' refers to both offences which have been reported by the public and offences which have been detected by police in the course of their duties and/or criminal investigations.

Offences Cleared

The term 'cleared' used by police, refers to the solution of a crime, and not to the trial by court and final disposition.

Offences 'cleared' refers to all offences which have resulted in one of the following outcomes:

- Court proceedings: a police action against a person to facilitate a court appearance to answer charges.
- Community conference: a person is directed to attend a meeting with the victim and other persons affected, where their behaviour and its consequences are discussed. A conference may impose one or more undertakings.
- Formal caution: a person is formally warned that engaging in the specified conduct is against the law and that there are various sanctions that can be applied by the police to prevent and punish such conduct.
- Informal caution: a person is informally warned that engaging in such conduct is against the law.
- Infringement notice: a person is issued an infringement notice (excluding cautions) with a statutory penalty, which may incur a fine (from 2015).
- Infringement notice caution: a person is issued an infringement notice as a caution, in which case the statutory penalty is not applied or enforced (from 2015).
- Instruction of the prosecuting authority: the prosecuting authority deems that there is no likelihood of conviction, for example death or other absence of the victim.
- Lapsed: time limitations or a statute bar have meant that an identified offender could not be proceeded against.
- Unable to proceed: one or more offenders have been identified but no action is able to be taken due to: diplomatic immunity, incompetence of the alleged offender(s), death of the alleged offender, imprisonment or age of the offender.
- Unfounded: upon attendance or investigation, police are unable to establish whether or not the reported offence occurred.

- Withdrawn: the complainant/victim does not wish for the matter to proceed, and will not cooperate further with police, even though an offence has occurred. The victim's decision not to proceed is made before any proceedings against an identified offender commence (revised at the state and national level in 2014).

Tasmania Police employs the National Crime Recording Standard (NCRS) in the recording of offences. The NCRS was developed by police statisticians from each Australian jurisdiction in conjunction with the National Crime Statistics Unit of the Australian Bureau of Statistics, and was implemented in 2008. Under the NCRS Tasmania Police utilises the following four offence statuses that identify recorded offences that will not be counted in police statistics:

- No crime: it is clear that an incident did not constitute an offence, either because the offence is found to have no foundation or the victim/complainant admits to, or is suspected of, having made a false report.
- Transferred to another State or Territory: an offence has occurred but is outside the responsibility of the police jurisdiction to which the report has been made.
- Additional offence: the offence unnecessarily duplicates a different offence recorded on the same report.
- Duplicate offence: the offence is found to be a duplicate of another offence.

Data Sources

Statistics have been extracted from the Offence Reporting System 2 of the Department of Police, Fire and Emergency Management on 1 August 2019. 2017-18 data have been revised.

Reference Period

Statistics are compiled according to the date an offence becomes known to police, which is not necessarily the date an offence was committed, nor the date a crime report was processed

The total number of offences cleared during a reference period is included, regardless of whether the offence was recorded in the current or a previous reference period. It is therefore possible that the number of offences cleared for a particular offence may be greater than the number recorded for that period.

The number of motor vehicles recovered during the reference period includes motor vehicles reported stolen within, and prior to, the reference period.

Counting Methodology

The basic counting unit for police statistics is the victim. One unique offence is counted for each victim per incident (Offence Report); the number of offenders is irrelevant. The victim-based rule is applied regardless of the number of criminal acts in cases where a series of related criminal acts are committed against the same victim.

A victim is defined according to the type of offence and can be a person, organisation, premise or motor vehicle.

- Offences Against the Person: one offence of each unique statistical offence type is counted for each victim per incident (Offence Report) where a victim can be an individual person or an organisation.
- Offences Against Property: one offence of each unique statistical offence type is counted for each victim per incident (Offence Report) where a victim can be a person, organisation or place/premise, depending on the offence type. Premises victims can vary according to occupancy arrangements. For Stolen Motor Vehicles the victim is the motor vehicle.
- Fraud and Similar Offences: one offence of each unique statistical offence type is counted for each victim per incident (Offence Report) where a victim can be a person or an organisation.
- Other (Miscellaneous) Offences: one of each unique statistical offence is counted for each victim per incident (Offence Report) where a victim can be a person or an organisation.

Attempted murder is counted separately to murder; all other offence attempts are included in their respective offence types for counting purposes.

Counting rules for Tasmania Police statistics differ slightly from those used for the national Recorded Crime Victims Statistics (RCVS) publications. Tasmania Police counts one offence per offence type per victim per incident (Offence Report). In the RCVS, the most serious offence per national offence category per victim per incident (Offence Report) is counted. National offence categories are broader than Tasmania Police offence types. Tasmania Police counts cleared offences as offences cleared in the reporting period, regardless of when the offence was reported. In the RCVS, cleared offences are counted as offences reported in the reporting period that have been cleared at a set date after the recording of the offence.
