

The table below summarises the number of charges laid with these charge types for that period. The charges relate to either Crown Land legislation, National Parks and or Reserved Land legislation only. It is not possible to statistically breakdown these statistics further into the categories requested.

It should be noted that the majority of charge types can be utilised for a range of property types outside of wood/timber and cannot be separated for reporting purposes. These may include non-timber plant matter, rock, soil, sand, humus, guano, shells and others. Therefore, it cannot be assumed that the statistics below are representative of timber-removal activity alone. These statistics should be used with caution.
